RELEVANT WORK EXPERIENCE

Software Engineering Intern - GE Vernova July 2026 - July 2027 | ***Angular, Playwright, Jest, Confluence***

- Deilvered features using test-driven development in a large-scale monorepo with an Agile team
- Contributed to a domain agnostic Angular map component for use in web apps across the organization
- Strengthened end-to-end test reliability by updating GitHub Actions CI workflows to auto-capture screenshots and videos on failing e2e tests
- Developed and presented a web app for visualizing networks at a high level

UI/UX Design Volunteer - Pearl Media July 2025-Present | ***Figma, Next.js, TypeScript, Tailwind***

- Created visually appealing interactive figma prototypes for a web comics web app

Software Developer - Aberdeen Software Factory - July 2025-July 2026 | ***Figma, Next.js, TypeScript, Docker***

- Produced wireframes and interactive mockups which provided design direction and clarity to the client
- Implemented frontend for a circular credit reward based educational web based platform that connects university students with local businesses
- Configured automated workflows to separate frontend and backend development

Computer Science Class Representative Year 2 - University of Aberdeen 2023-2024

- Gathered feedback from students, attended meetings, & liasing with lecturers during busy periods

Programming Demonstrator - University of Aberdeen Oct 2023-Dec 2023 | ***Python***

- Led weekly practicals for students taking python
- Helped students debug their code and explain technical concepts in a digestible manner

PROJECTS & ACHIEVEMENTS

Aberdeen University Hackathon 2025 1st place - April 2025 | ***Python, Django, JavaScript, CSS***

- Built a gamified university assignment-tracking platform with leaderboards, badges, and AI assistance
- Awarded first place for technical execution and design. https://github.com/caitlinthaeler/team-3.git

SAR 2.0 - Oct 2024-May 2025 | ***PHP, Python, Vue.js, Laravel, Agile, Scrum, API***

- Finalist at the Inform Prize Event for a UNESCO-recognised Search Aberdeen Registers corpus app
- Led a major infrastructure refactor, improving security and team productivity, reducing backend cost to £0
- Awarded 10% extra marks by peers for significant contribution

Stirred From Stone - March 2025 | ***Unity, C#, Aseprite***

- Programmed core gameplay for a 3D thriller story driven game based on a real cathedral in Aberdeen and inspired by Scottish folklore
- Players must explore the cathedral, graveyard, and crypt to complete unique events while being haunted by a restless ghost. https://github.com/caitlinthaeler/RCR-game-jam-2025.git

Kessler Syndrome - Oct 4-5, 2024 | ***Unity, C#, Visual Studio***

- Coded a dystopian space game in Unity for the NASA hackathon demonstrating the harmful impacts of space junk in Earth's atmosphere
- Generated clusters of various sized objects, successfully preventing spawn collisions through rigorous testing. https://github.com/caitlinthaeler/nyskooo.git

Rogue Cat Game 2020-2021 | ***Unity, C#, Visual Studio, Aseprite***

- Developed a 2D RPG Warriors inspired procedurally generated game in Unity with Visual Studio with animated custom spritesheets
- Constructed interactions, level system, inventory, and crafting. https://www.caitlinthaeler.com/projects

EDUCATION

University of Aberdeen - Msci Computing Science w/ Industrial Placement 2022-2027 Predicted 1:1
Portsmouth High School - A-levels 2020-2022 - Computer Science (A), Mathematics (A), Physics (C), EPQ (A*)

IT AND TECHNICAL SKILLS

Languages: Python, C#, Java, C, PHP, JavaScript, TypeScript, SQL, Ruby, Lua, C
Web: HTML, CSS, Tailwind, Bootstrap, Next.js, React, Vue.js, Angular, Django, Laravel, .NET apps, Jekyll, REST API
Databases, Cloud & Deployment: MongoDB, PostgreSQL, Prisma, Vercel, Cloudflare (R2 bucket storage)
Development Tools: GitHub, Docker, Visual Studio, VS Code, Unity, ROS2, Webots, Defold, Aseprite, Figma, AppScript, UML, Scrum, Agile, MacOS, Unix, Prefect, Playwright, Jest, Copilot, Claude Code
